

### Flow Diagram for Dowhileloop

Infinite loop-

```
1 package javasessions;
2
3 public class DoWhileLoop {
4
5     public static void main(String[] args) {
6
7         //1 to 10:
8         int i = 1;
9         do {
10             System.out.println(i);
11         }
12         while(i<=10);
13     }
```

Prints 1 infinite times.

Prints 1 to 10-

```

1 package javasessions;
2
3 public class DoWhileLoop {
4
5     public static void main(String[] args) {
6
7         //1 to 10:
8         int i = 1;
9         do {
10            System.out.println(i);|
11            i++; //11
12        }
13        while(i<=10);
14
15    }
16 }

```

Prints 1 and stops.

```

1 package javasessions;
2
3 public class DoWhileLoop {
4
5     public static void main(String[] args) {
6
7         //1 to 10:
8         int i = 1;
9         do {
10            System.out.println(i); //1
11            i++; //2
12        }
13        while(i>=10);
14
15    }
16 }

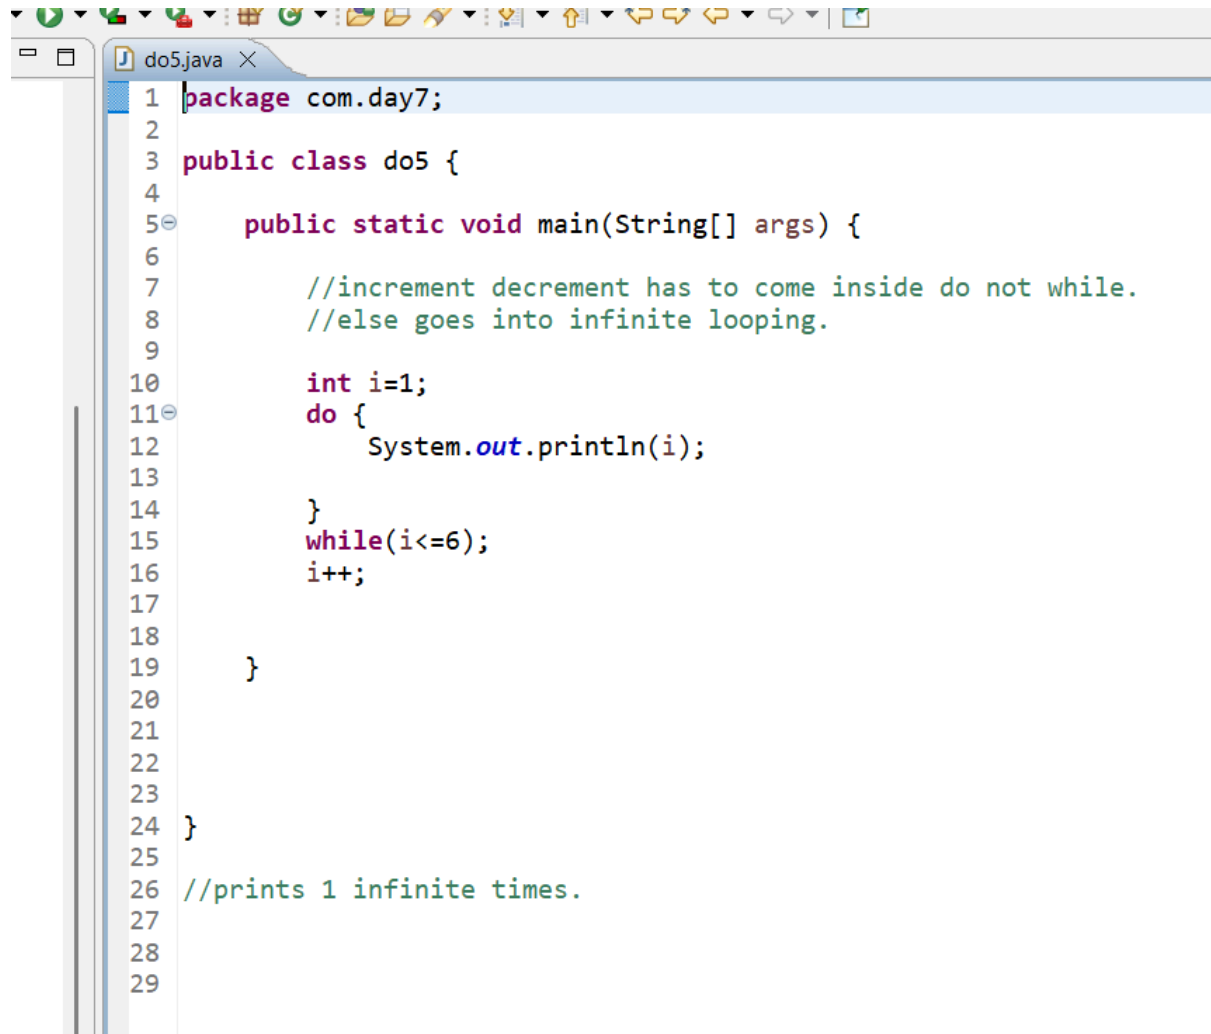

```

Prints 1,2.

```
LoopsConcept.java DoWhileLoop.java
1 package javasessions;
2
3 public class DoWhileLoop {
4
5     public static void main(String[] args) {
6
7         //1 to 10:
8         int i = 1;
9         do {
10             System.out.println(i); //1
11             i++; //2
12         }
13         while(i >= 10);
14
15         System.out.println(i); //1
16
17
18
19     }
20
```

paste do5

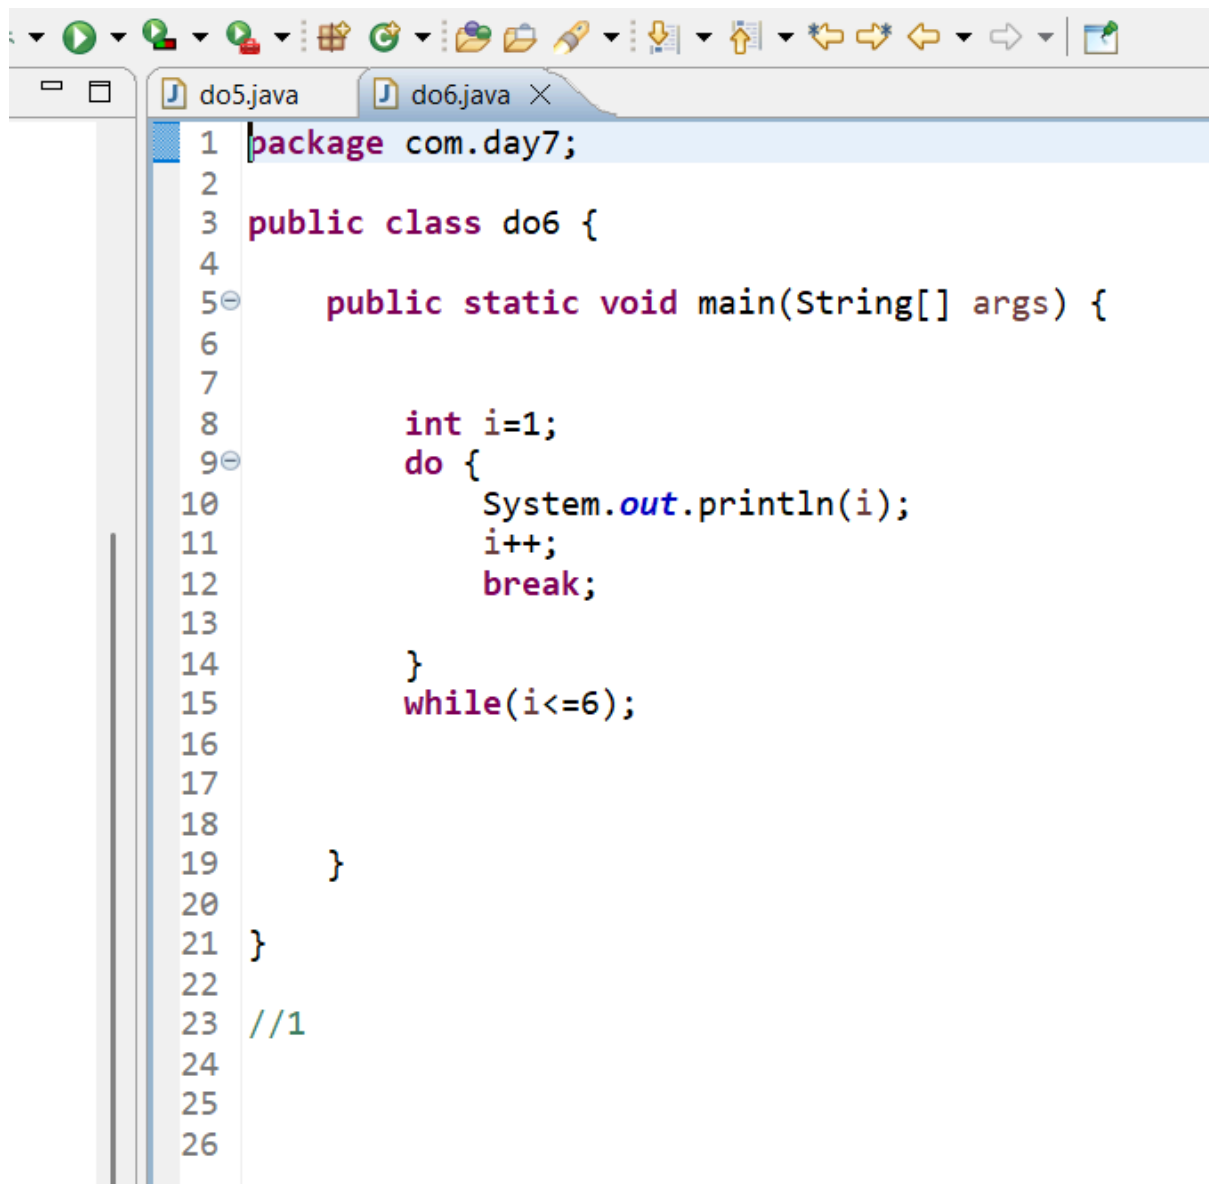

```
1 package com.day7;
2
3 public class do5 {
4
5     public static void main(String[] args) {
6
7         //increment decrement has to come inside do not while.
8         //else goes into infinite looping.
9
10        int i=1;
11        do {
12            System.out.println(i);
13
14        }
15        while(i<=6);
16        i++;
17
18    }
19
20
21
22
23
24 }
25
26 //prints 1 infinite times.
27
28
29
```

Prints 1.

```
1 package javasessions;
2
3 public class DoWhileLoop {
4
5     public static void main(String[] args) {
6
7         //1 to 10:
8         int i = 1;
9         do {
10             System.out.println(i); //1
11             i++; //2
12             break;
13         }
14         while(i >= 10);
15
```

paste do6

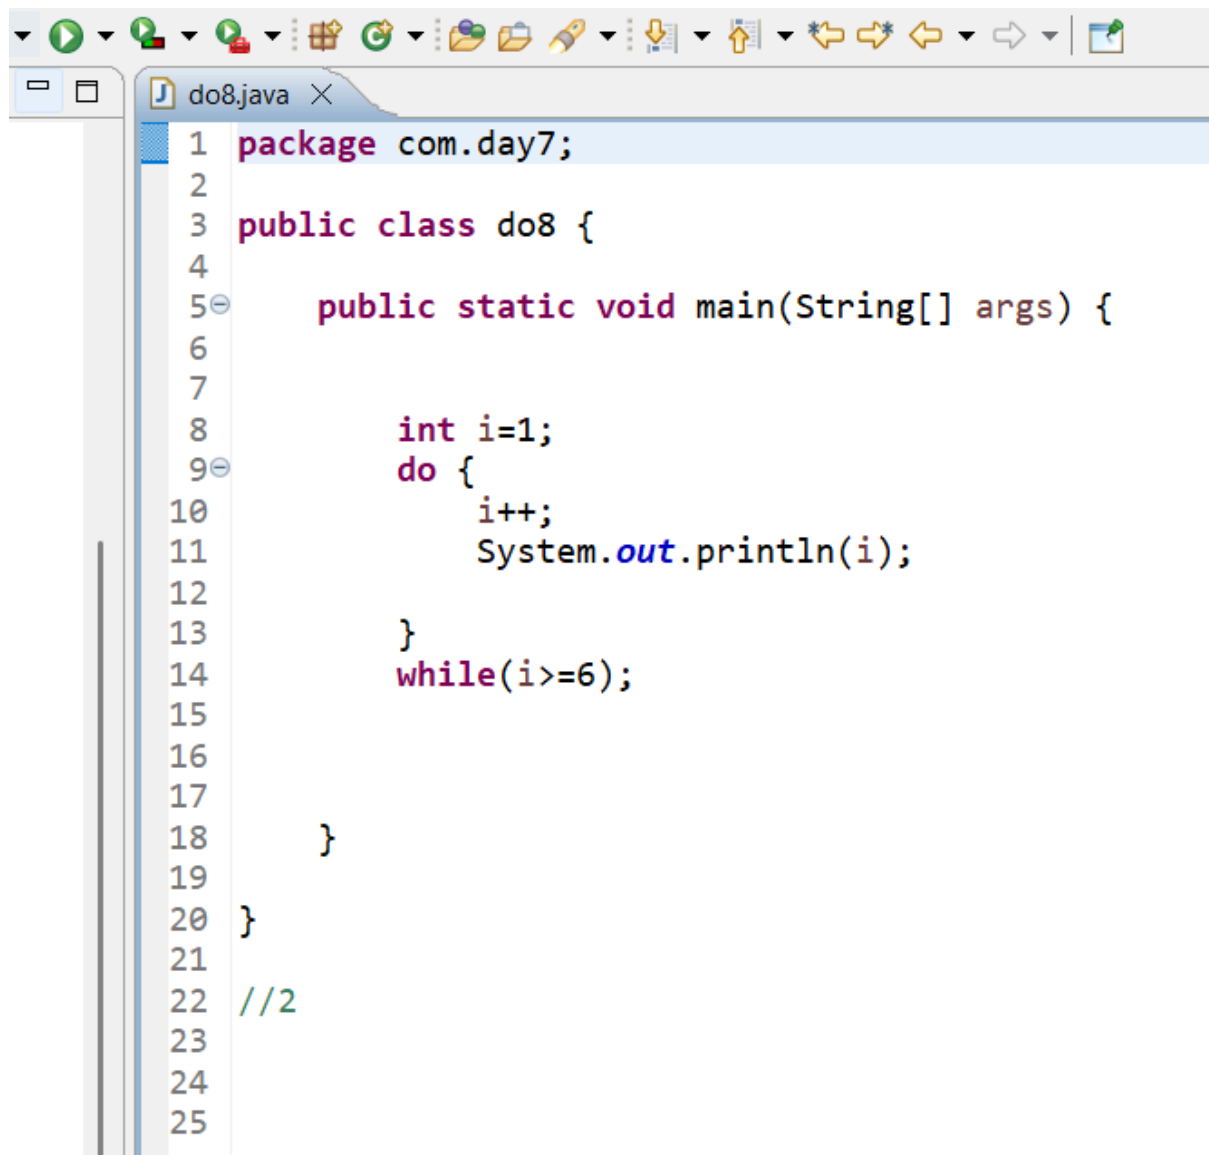

```
1 package com.day7;
2
3 public class do6 {
4
5     public static void main(String[] args) {
6
7
8         int i=1;
9         do {
10             System.out.println(i);
11             i++;
12             break;
13
14         }
15         while(i<=6);
16
17
18
19     }
20
21 }
22
23 //1
24
25
26
```

Prints 2 to 11.

```
1 package javasessions;  
2  
3 public class DoWhileLoop {  
4  
5     public static void main(String[] args) {  
6  
7         //1 to 10:  
8         int i = 1;  
9         do {  
10            i++; //11  
11            System.out.println(i); //234567891011  
12  
13            //break;  
14        }  
15        while(i<=10);
```

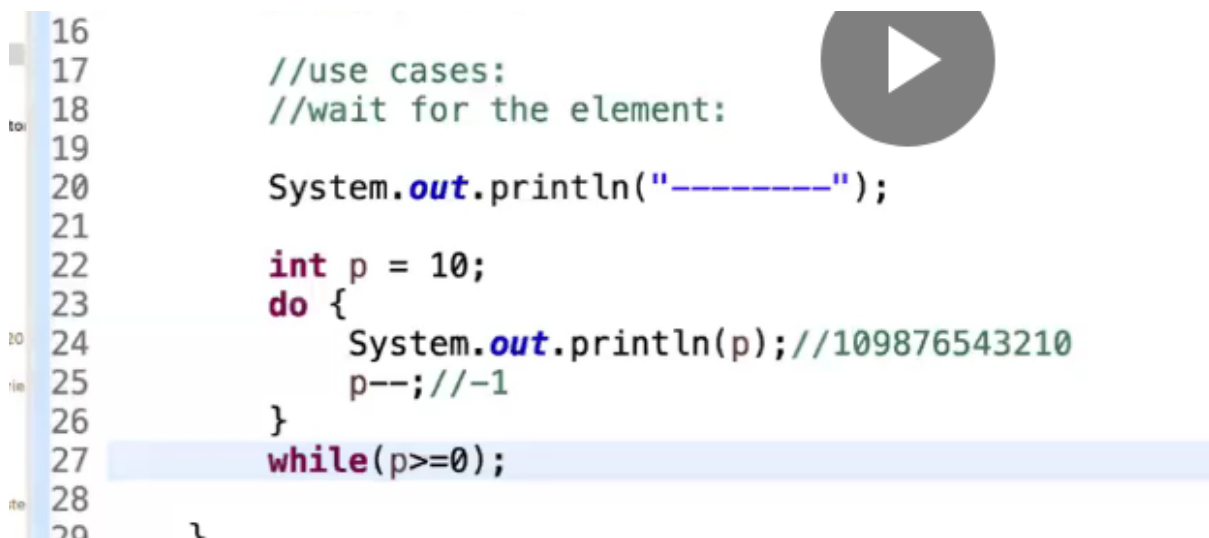

paste do8

```

1 package com.day7;
2
3 public class do8 {
4
5     public static void main(String[] args) {
6
7
8         int i=1;
9         do {
10             i++;
11             System.out.println(i);
12
13         }
14         while(i>=6);
15
16
17
18     }
19
20 }
21
22 //2
23
24
25

```

```

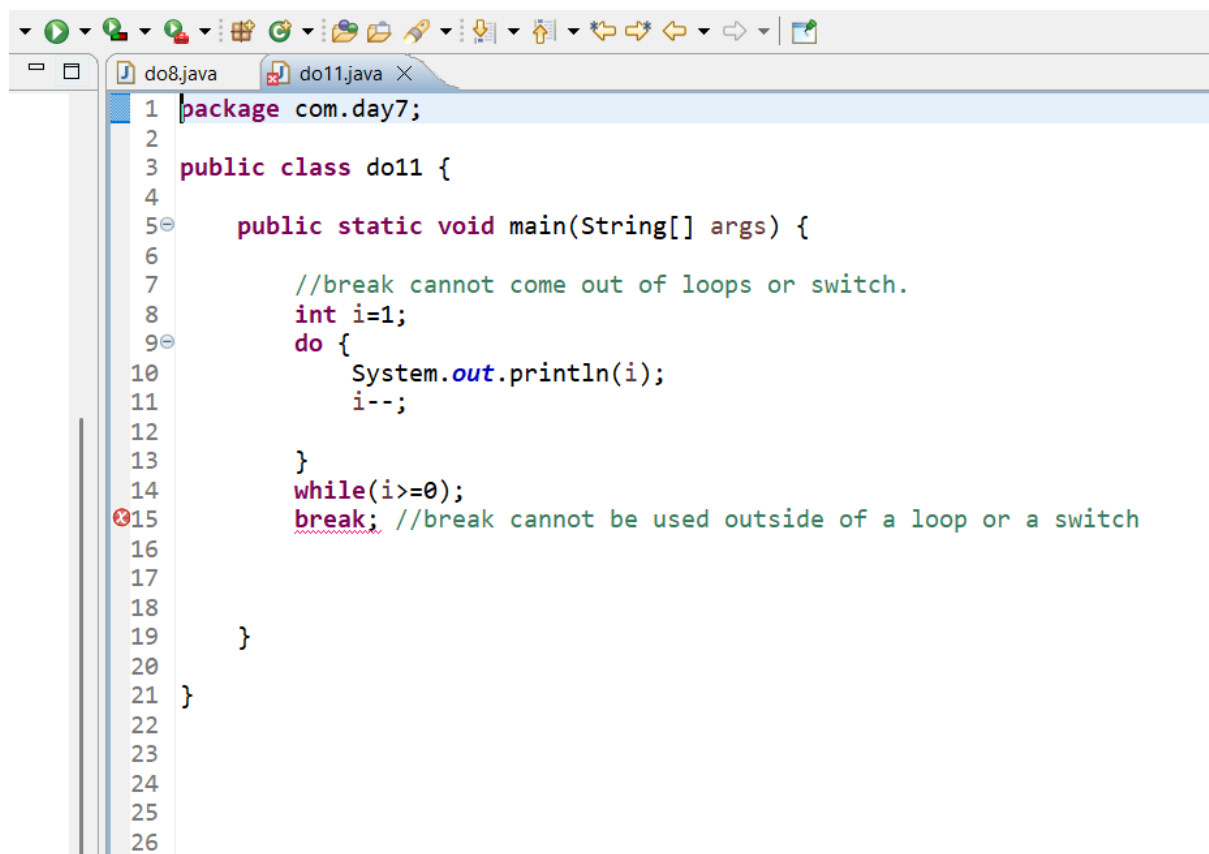

16
17 //use cases:
18 //wait for the element:
19
20 System.out.println("-----");
21
22 int p = 10;
23 do {
24     System.out.println(p); //109876543210
25     p--; // -1
26 }
27 while(p>=0);
28
29

```

Prints 10 to 0.

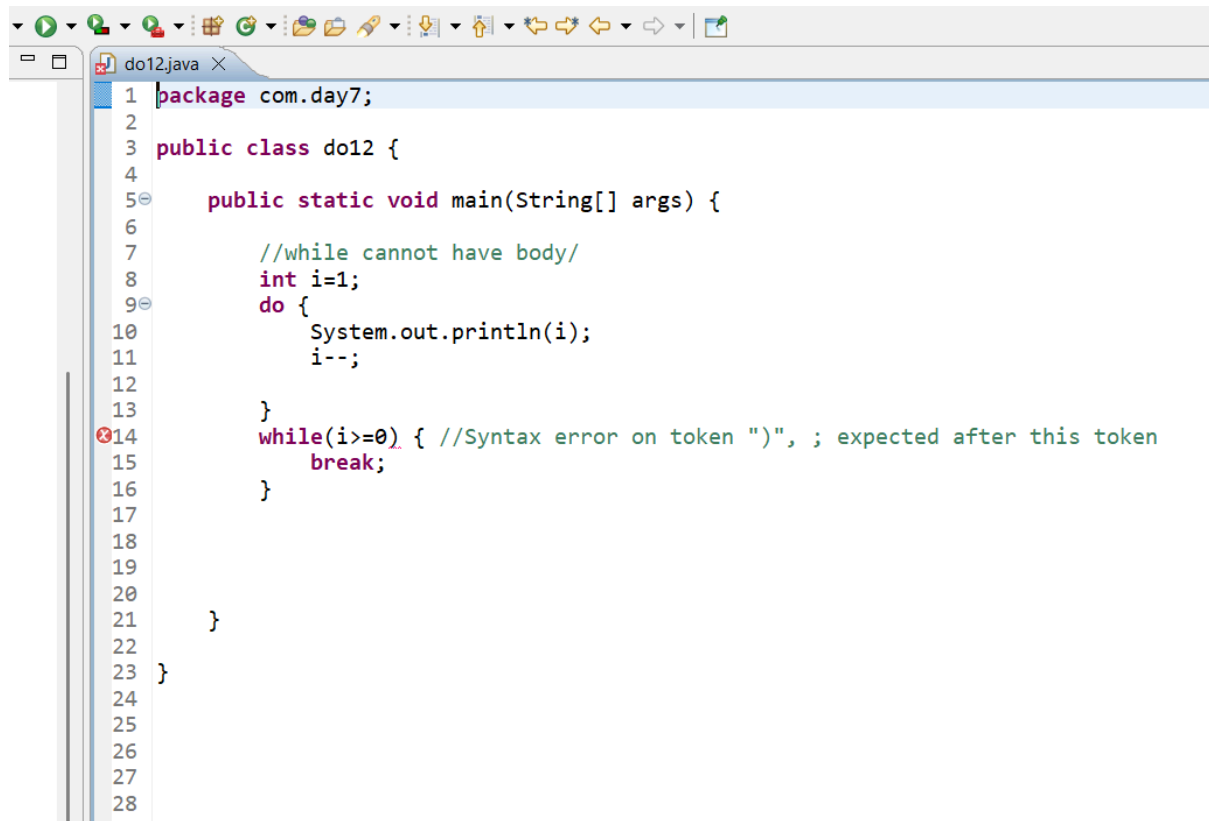

Break cannot be written outside loop-  
**paste do11**

```
1 package com.day7;
2
3 public class do11 {
4
5     public static void main(String[] args) {
6
7         //break cannot come out of loops or switch.
8         int i=1;
9         do {
10             System.out.println(i);
11             i--;
12
13         }
14         while(i>=0);
15         break; //break cannot be used outside of a loop or a switch
16
17     }
18
19 }
20
21 }
22
23
24
25
26
```

This is not allowed-  
No while body.

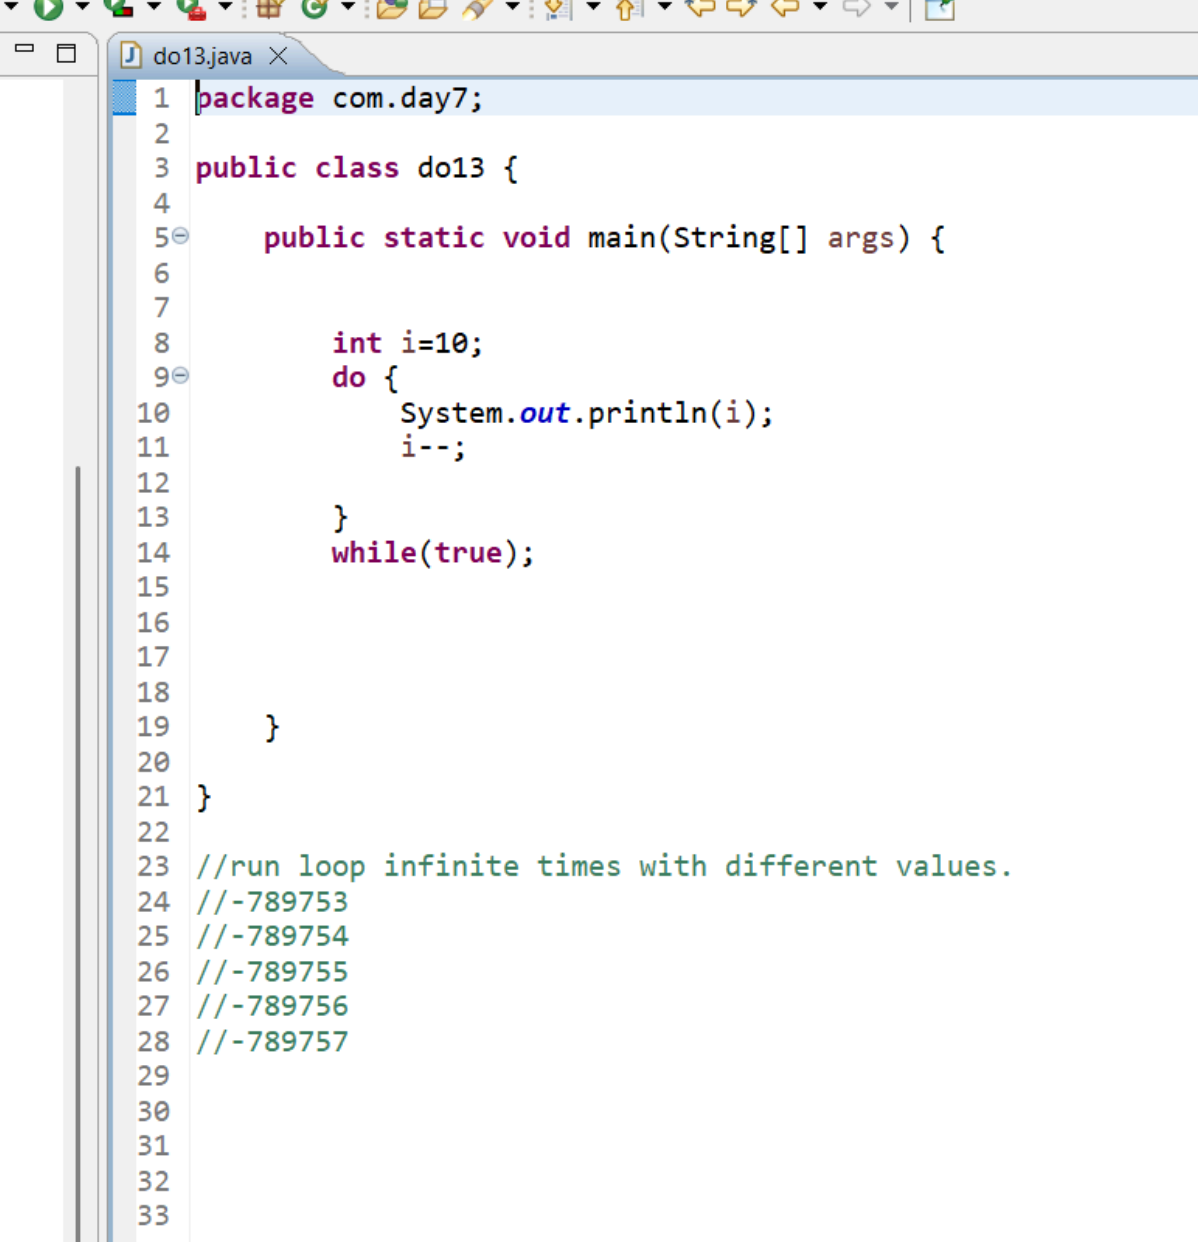

**paste do12**

```
1 package com.day7;
2
3 public class do12 {
4
5     public static void main(String[] args) {
6
7         //while cannot have body/
8         int i=1;
9         do {
10             System.out.println(i);
11             i--;
12
13         }
14         while(i>=0) { //Syntax error on token ")", ; expected after this token
15             break;
16         }
17
18     }
19
20 }
21
22
23
24
25
26
27
28
```

Keep running the loop with different values-

**paste do13-**

```
1 package com.day7;
2
3 public class do13 {
4
5     public static void main(String[] args) {
6
7
8         int i=10;
9         do {
10             System.out.println(i);
11             i--;
12
13         }
14         while(true);
15
16
17
18
19     }
20
21 }
22
23 //run loop infinite times with different values.
24 //-789753
25 //-789754
26 //-789755
27 //-789756
28 //-789757
29
30
31
32
33
```

Can write any condition-

```

1 package javasessions;
2
3 public class DoWhileLoop {
4
5     public static void main(String[] args) {
6
7         //1 to 10:
8         int i = 1;
9         do {
10             i++; //11
11             System.out.println(i); //234567891011
12
13             if(i==7) {
14                 System.out.println("hello");
15             }
16
17             //break;
18         }
19         while(i<=10);

```

Print even numbers from 2 to 100-

```

35
36 //
37 for(int k=1; k<=100; k++) {
38     if(k % 2 ==0 ) {
39         System.out.println(k); //2
40     }
41 }

```

Print odd numbers between 1 to 100-

```

35 System.out.println(k); //1
36 //
37 for(int k=1; k<=100; k++) {
38     if(k % 2 ==1) {
39         System.out.println(k); //2
40     }
41 }

```

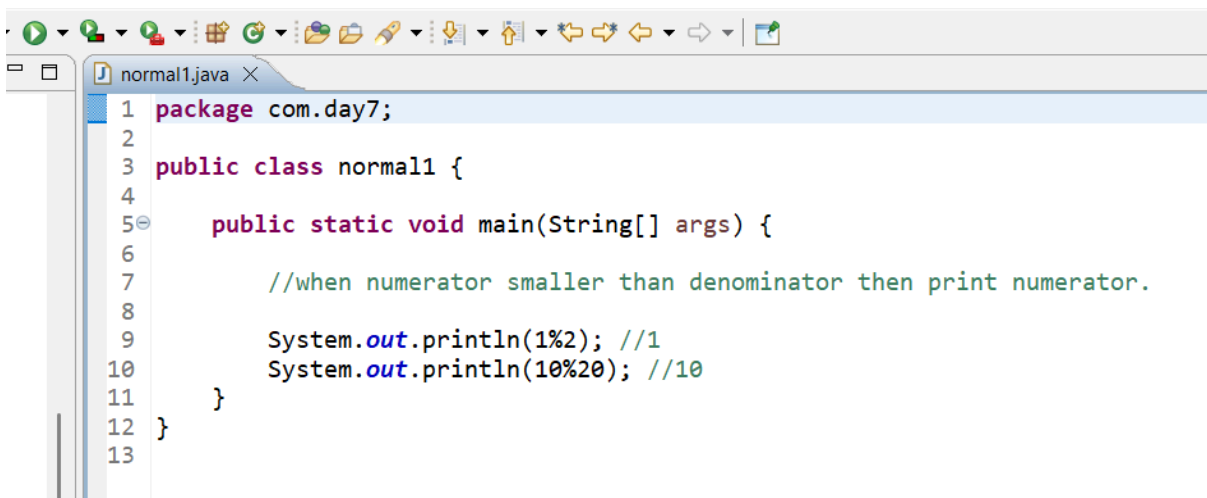

Prints 1.

```

7
8 System.out.println(1 % 2);
9
10

```

paste normal1

```

normal1.java
1 package com.day7;
2
3 public class normal1 {
4
5     public static void main(String[] args) {
6
7         //when numerator smaller than denominator then print numerator.
8
9         System.out.println(1%2); //1
10        System.out.println(10%20); //10
11    }
12 }
13

```

Print even numbers between 2 to 10-

```

40
47
48 System.out.println("-----");
49
50 for(int e=2; e<=10; e=e+2) {
51     System.out.println(e);//
52 }
53

```

Print even numbers between 0 to 10-

```

47
48     System.out.println("-----");
49
50     for(int e=0; e<=10; e=e+2) {
51         System.out.println(e);//
52     }
53
54

```

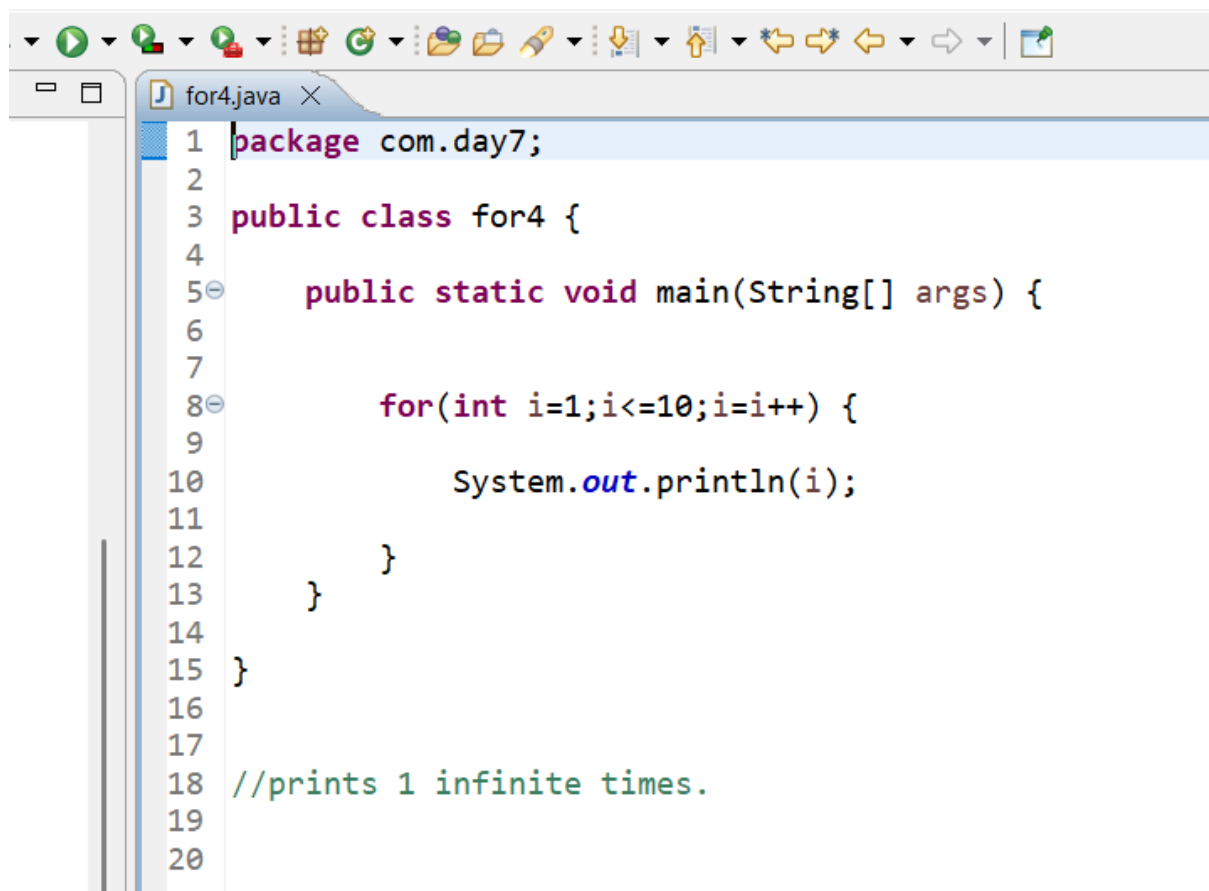

Print even numbers between 2 to 10-

```

49
50     for(int e=1; e<=10; e++) {
51         e++;
52         System.out.println(e);//
53     }
54

```

## paste for 4

```

1 package com.day7;
2
3 public class for4 {
4
5     public static void main(String[] args) {
6
7
8         for(int i=1;i<=10;i=i++) {
9
10            System.out.println(i);
11
12        }
13    }
14
15 }
16
17
18 //prints 1 infinite times.
19
20

```

## Print odd numbers between 1 to 10-

```

49
50     for(int e=1; e<=10; e++) {
51         System.out.println(e);//
52         e++;
53
54     }

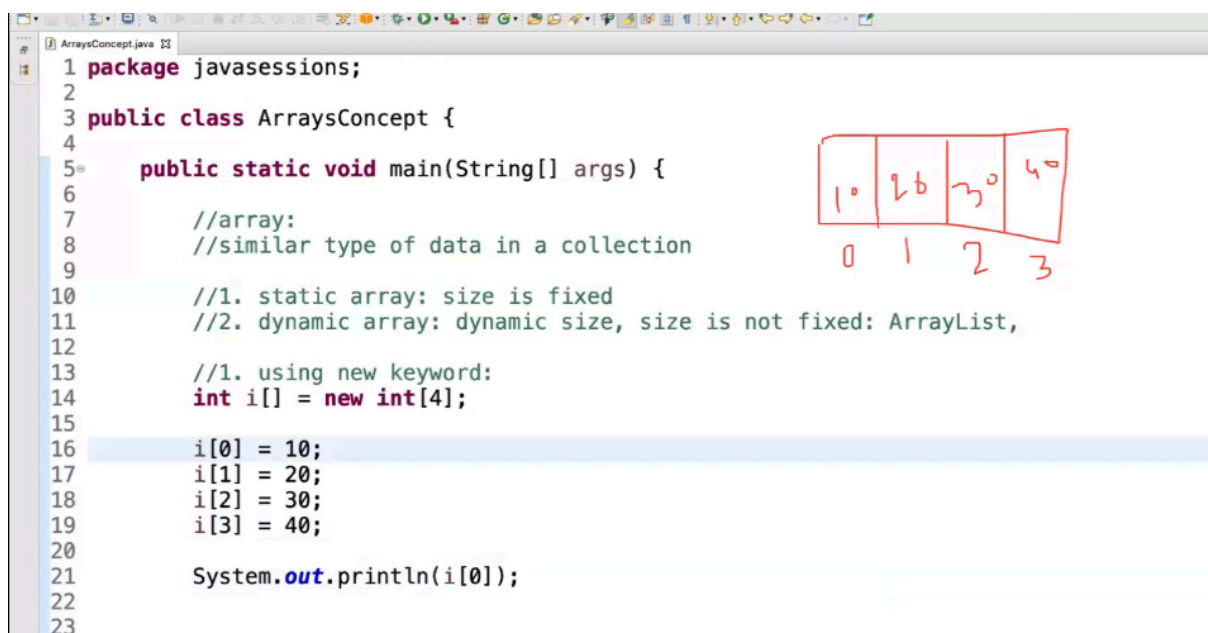

```

Li = 0  
 length = 4  
 Hi = 3

---

Li=0  
 length = Hi+1  
 Hi=length-1

```

1 package javasessions;
2
3 public class ArraysConcept {
4
5     public static void main(String[] args) {
6
7         //array:
8         //similar type of data in a collection
9
10        //1. static array: size is fixed
11        //2. dynamic array: dynamic size, size is not fixed: ArrayList,
12
13        //1. using new keyword:
14        int i[] = new int[4];
15
16        i[0] = 10;
17        i[1] = 20;
18        i[2] = 30;
19        i[3] = 40;
20
21        System.out.println(i[0]);
22
23    }

```

10.

## Negative index not allowed-

```
23
24      System.out.println(i[-1]);
```

see the error.

```
//Exception in thread "main" java.lang.ArrayIndexOutOfBoundsException: Index -1
out of bounds for length 5
//at com.day7.array2.main(array2.java:16)
```

## Array index out of bounds exception.

```
25
26      System.out.println(i[4]); //AIOB
27
```

similar exception we get -

```
Exception in thread "main" java.lang.ArrayIndexOutOfBoundsException: Index 14
out of bounds for length 5
    at com.day7.array3.main(array3.java:16)
```

## Before assigning values print it-

```

12
13 //1. using new keyword:
14 int i[] = new int[4];
15 System.out.println(i[0]); //0
16
17
18 i[0] = 10;
19 i[1] = 20;
20 i[2] = 30;
21 i[3] = 40;
22

```

Zero.

```

29 //to print all the values of array, use for loop
30
31 System.out.println("Li = " + 0);
32 int len = i.length; //4
33 System.out.println("length = " + len);
34 System.out.println("Hi = " + (len-1));
35

```

0,4,3.

Print all array values-

```

35
36 System.out.println("-----");
37 //0-3
38 for(int k=0; k<=3; k++) {
39     System.out.println(i[k]); //10 20 30 40
40 }
41
42
43 //0-3
44 for(int k=0; k<=len-1; k++) {
45     System.out.println(i[k]); //10 20 30 40
46 }
47

```

```

37 //0-3
38 for(int k=0; k<=i.length-1; k++) {
39     System.out.println(i[k]); //10 20 30 40
40 }
41
36 system.out.println("-----");
37 //0-3
38 for(int k=0; k<=i.length; k++) {
39     System.out.println(i[k]); //10 20 30 40
40 }
41

```

10,20,30,40, array index out of bounds.

```

38 for(int k=0; k<i.length; k++) {
39     System.out.println(i[k]); //10 20 30 40
40 }
41

```

```

43
44 //without for loop, want to print the values of array:
45
46 System.out.println(Arrays.toString(i));
47
48
49 //
50

```

[10,20,30,40]

**paste array11**

```

1 package com.day7;
2
3 import java.lang.reflect.Array;
4 import java.util.Arrays;
5
6 public class array11 {
7
8     public static void main(String[] args) {
9
10         int[] arr = new int[4];
11         arr[0] = 10;
12         arr[1] = 20;
13         arr[2] = 30;
14         arr[3] = 40;
15
16         //without for loop print array values.
17         //use to string method.
18         //prints array memory address.
19
20         String s1;
21         try {
22             s1 = Arrays.toString(); //Cannot make a static reference to the non-static method
23             //toString() from the type Object
24         } catch (Exception e) {
25             // TODO Auto-generated catch block
26             e.printStackTrace();
27         }
28         System.out.println(s1);
29
30         System.out.println(Arrays.toString()); //Cannot make a static reference to the non-static method
31         //toString() from the type Object
32     }
33 }
34
35

```

## Skip values and fill values-

```

40         System.out.println(Arrays.toString(p));
41
42         //
43
44         int p[] = new int[3];
45
46         p[1] = 100;
47         System.out.println(p[1]);
48         System.out.println(p[0]);
49         System.out.println(p[2]);
50
51
52
53
54
55
56
57

```

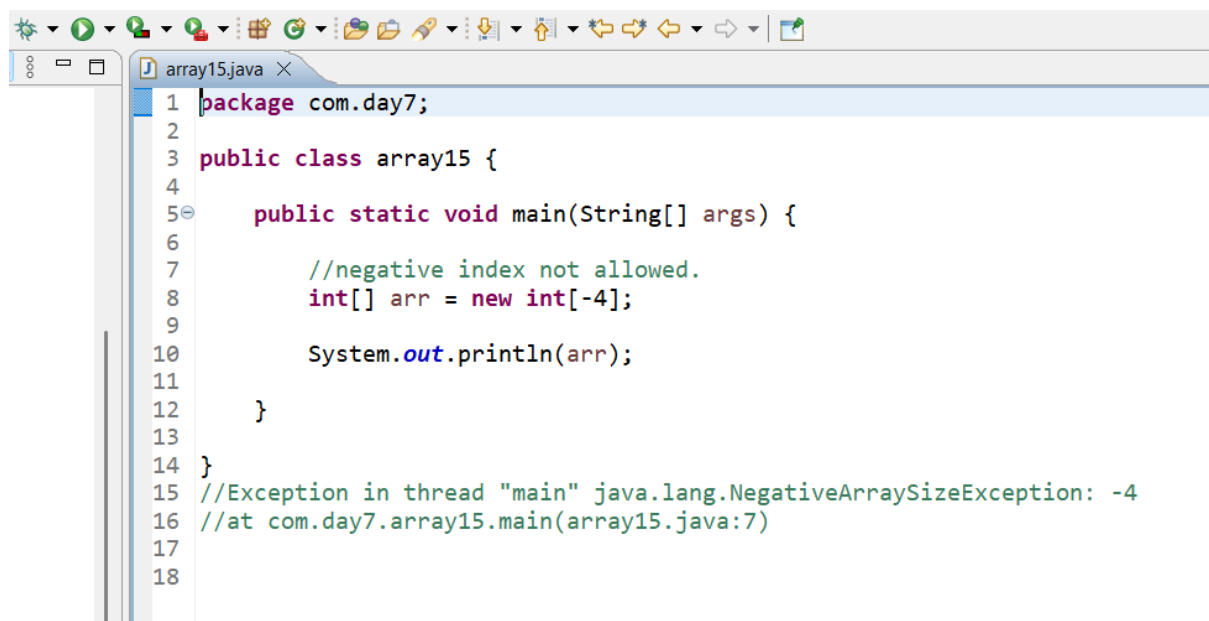

100, 0, 0.

```
48
49      //
50
51      int p[] = new int[3];
52
53      p[4] = 50; //AIOB
54      System.out.println(p[4]);
```

at run time we get index issue error.

Negative index not allowed-

### paste array15

```
1 package com.day7;
2
3 public class array15 {
4
5     public static void main(String[] args) {
6
7         //negative index not allowed.
8         int[] arr = new int[-4];
9
10        System.out.println(arr);
11
12    }
13
14 }
15 //Exception in thread "main" java.lang.NegativeArraySizeException: -4
16 //at com.day7.array15.main(array15.java:7)
17
18
```

Character with int-

```

47
48
49
50 int p[] = new int[4];
51 p[0] = 100;
52 p[1] = 'a';
53
54 // p[3] = 50; // AI0B
55 System.out.println(p[1]);
56

```

Prints 97.

Int stores char, we print in char form-

```

40
47
48
49
50 int p[] = new int[4];
51 p[0] = 100;
52 p[1] = 'a';
53
54 // p[3] = 50; // AI0B
55 System.out.println((char)p[1]);
56

```

Prints a.
